நான் நேர்மையாகவே நடப்பேன் — E-book sample features

The two samples

Both samples are the same story, presented in different ways.

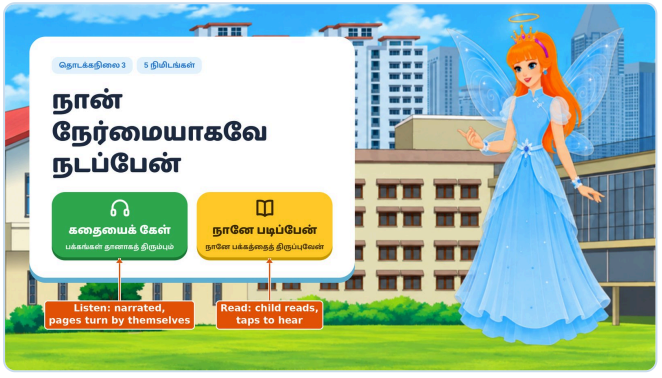

Version	What it is	Built with
Version 2 (latest)	New interactive e-book built for this ITQ	HTML5, SCORM 1.2
Version 1 (earlier)	First sample, page-by-page slides	Articulate Storyline 360 (HTML5), SCORM 1.2

Links to both samples and the voice-over files are on the samples page on GitHub: https://andrilthiru.github.io/smallreader/

Version 2: start screen and story page

The child chooses how to read on the start screen and can switch at any time. Every story page has the same toy-block controls, so children learn them once. Every word can be heard: in Listen mode (கேள்) the child taps any word to hear it, and in Read mode (படி) the child taps a speech bubble or caption to hear that line. Underlined words open a short video in both modes.

- **Listen (கேள்):** the narrator reads, words light up karaoke-style, and pages turn by themselves.
- **Read (படி):** the child reads at their own pace and taps to hear.
- **Sound effects:** a wand swish, falling sweets and a school bell play as the story reaches them.
- **Even audio:** all narration is levelled to the same loudness and tone, although it was recorded in different studios.

Start screen: choose Listen or Read

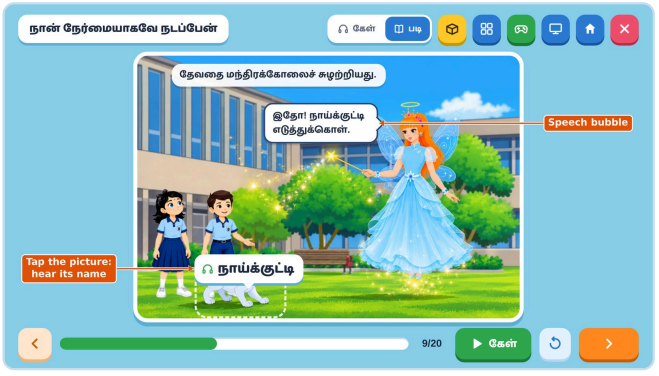

Story page in Listen mode, with every control labelled

Version 2: read mode and picture taps

In Read mode the text sits on the picture in speech bubbles and captions, like a picture book. Tapping a bubble reads just that line, with the words lighting up. On some pages, tapping the fairy, sweets, puppy or teddy says its name.

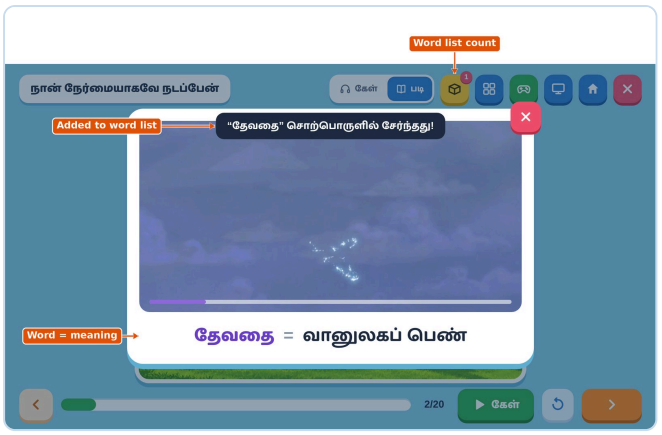

Read mode: narration caption and speech bubbles on the picture

Tapping the puppy shows and says its name

Version 2: video words, word list and story cards

Words with a dashed underline open a short video with the word and its meaning. Each video word the child opens is collected in the word list (சொற்பொருள்), where it can be replayed. Story cards show every page as a picture, so the child or teacher can jump to any page.

Video word pop-up with its meaning

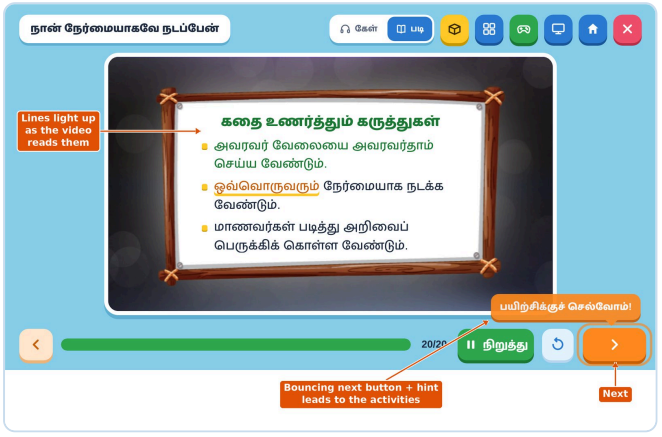

Word list (சொற்பொருள்)

Story cards: jump to any page

Version 2: closing page

The story's three lessons sit on the board inside the closing video and light up as the video reads them. When the page ends, the next button bounces and a bubble invites the child to the activities.

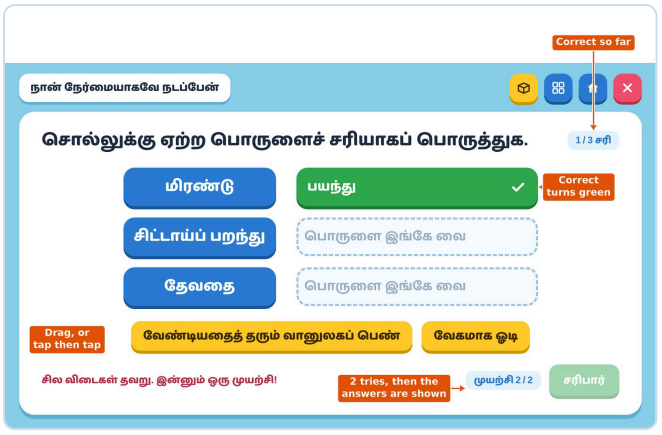

Closing page: karaoke on the video board and the nudge to the activities

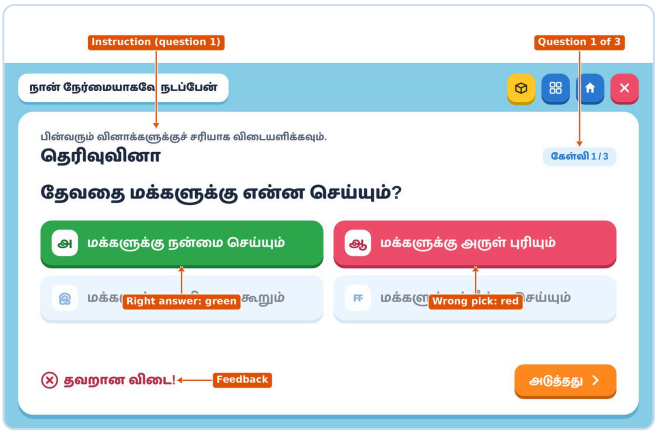

Version 2: activities

The activities follow the story: a matching exercise, a three-question multiple-choice quiz (தெரிவுவினா) and a results screen.

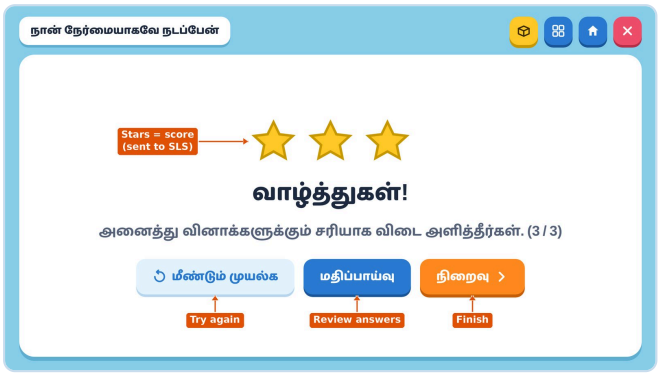

- **Matching:** drag or tap a meaning into place. Two tries, then the right answers are shown so no child gets stuck.
- **Quiz:** instant right/wrong feedback, with the right answer shown.
- **Results:** stars for the score, try again, review answers, finish. The score and completion are sent to SLS.

Matching with two tries

Quiz with instant feedback

Results screen

Version 1: the earlier sample

Version 1 is a Storyline slide book with a wooden frame. Text is part of each slide, highlighted words open videos, and a thumbnail menu lists the pages. The next arrow unlocks once the narration ends. Its activities are the same as Version 2’s.

Version 1 title screen

Version 1 story page, labelled

Feature comparison

Feature	Version 1	Version 2
Narration on every page	Yes	Yes
Karaoke word highlighting	No	Yes
Tap a word or line to hear it	No	Yes
Listen / Read modes, auto page turn	No	Yes
Text on picture (speech bubbles)	Yes	Yes (Read mode)
Even text size, text not baked into pictures	No	Yes
Video words with meaning	Yes	Yes
Word list of collected words	No	Yes
Tap the picture to hear names	No	Yes
Sound effects	No	Yes
Page thumbnails / story cards	Yes	Yes
Progress indicator	Yes (%)	Yes (bar + page number)
Full-screen class view	No	Yes
Matching, quiz, results	Yes	Yes
Limited tries, answers then shown	No	Yes
Resume where the child left off	Yes	Yes
SCORM 1.2 score and completion to SLS	Yes	Yes
Works offline	Yes	Yes

Technical notes

- **SCORM 1.2:** reports completion and quiz score to SLS, and saves the page reached so the child can resume.
- **Offline and secure:** every file is inside the package, with no internet calls, meeting the SLS content security rules.
- **Any screen:** the layout scales to laptops, tablets and projectors; it works with mouse, touch and keyboard.
- **Font:** all Tamil text is set to use Anjal InaiMathi; the licensed font file will be embedded in the final package.
- **Easy to update:** text, pictures, audio and videos are kept apart from the engine, so new stories reuse the same template.

Further enhancements

Enhancement	What it adds
Lip-sync	Characters' mouths move with the narration
Simple motion animation	Gentle movement in the pictures instead of static images
Record my reading	The child records a page and compares it with the narrator, offline
Puzzle games	Picture puzzles and sentence-ordering games from the story
Text size A− / A+	Larger print for weaker readers and class display
Pages-read ticks	Ticks on story cards and a pages-read count to encourage finishing
